Technical Information

Specification

CardMaster™

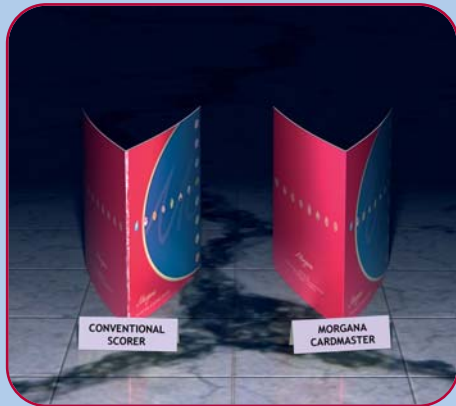

MAX. SHEET SIZE	460mm x 365mm (18" X 14.37")
MIN. SHEET SIZE	110mm x 80mm (5.5" x 4")
MAX. PAPER WEIGHT	Upto 350gsm+ (120lb Cover stock)
	(Note: May vary according to type of material)
SPEED PER HOUR	Average 150 cards per minute
	(Note: The production speed varies according to material size)
DIMENSIONS.....L: 1770mm x W: 790mm x H: 1040mm (43" x 31" x 41")	
WEIGHT	180Kg (396lb)
POWER REQUIREMENT	1phase 220/240v 50Hz (220v/60hz)

Rotary Creasing and Flying Knife Folding

Various manufacturers of scoring devices have made claims to have overcome the problems caused by scoring using different materials, but on heavy cross grain stocks or digital material, cracking and toner breaking still occur. The Morgana CardMaster, uses a unique Rotary CREASING & RULE device to crush the fibres of the material to prevent cracking and will emboss the ink or toner into the surface of the stock, without stopping the material as it passes through to the unique folding assembly. The proven Morgana Patented "Flying Knife" system reduces the possibility of any scratching on the surface area of delicate stock.

Computer Aided Automatic Set Up & Job Retrieval.

Job changes can be achieved in less than one minute. The operator simply dials in the sheet length

and the Morgana CardMaster will set the creasing and folding positions automatically. Press the feed switch and the suction feed system will start creasing and folding greetings cards at the rate of an average 150 cards per minute. Jobs can be stored for automatic retrieval.

Features:

- Bottom Suction Feed allows continuous loading.
- Total & Batch Counting
- Handles Litho and Digital Print.
- Requires only one non skilled operator.
- Uses Rotary Matrix Creasing not Rotary Scoring.
- Patented Flying Knife folding.
- Large diameter grooved rollers prevent build up of spray powder or toner.
- Computer aided set up.
- Job set up in under 60 seconds
- Produces an average of 150 greeting cards per minute.
