

NEOLT Trim 150/Trim 200 Paper Trimmers

NEOLT Trim Series Paper Trimmers are available in sizes from 39" to 79". A consistently smooth, clean cut is the result of the rolling blades being mounted on a ball bearing transport system on a chrome-plated guide rail. The rolling blades are self-sharpening, made of hardened steel and matched with stainless steel flat blades. Another nice feature is the transparent clamping strip that holds material securely during the cut, then automatically lifts when the cutting head has completed a pass. Metal baseboard includes both metric and standard measurements.

Features:

- Cutting head can be raised or lowered from any position on the bar.
- Cuts through all types of drawing, plotter and laminated media.
- Cutting head features smooth roller bearings.
- Rotary-action trimmers designed for fast, accurate trimming.
- Top-mounted swivel handle.
- Unique shoulder design enables cutting of material that is longer than the trimmer.
- Transparent clamp strip lifts automatically.
- Metal baseboard with rule tapes in inches and metric.

Specifications:

	TRIM150	TRIM200
Table Dimensions	69" x 16"	88" x 16"
Cutting Length	59"	79"
Cutting Capacity	7 sheets (1/32")	
Volume Rating	High	
Operation	Manual	
Shipping Weight	103 lbs. w/ stand	112 lbs. w/ stand
