

Standard Horizon PF-P310 Electronic Folding Machine Semi-Automatic Paper Folder

The PF-P310 Folder from Standard offers an economical solution for meeting today's folding requirements in any church, school, small in-plant, convenience printshop, reproduction center or data processing department. Folding up to 190 sheets per minute, the PF-P310 offers six standard fold formats including letter, Z-fold, gate fold, half fold, engineering fold and double parallel folds. You can even produce a cross fold with the optional cross fold guide.

Unique Design

The PF-P310 has two sets of fold plates horizontally positioned under the feed table to reduce machine noise and minimize space requirements. Push button controls, LED indicator lamps and simple fold-plate adjustment controls allow the operator to quickly and accurately dial-in the desired fold. The control panel also features a single sheet test feed button to assist the operator during setup.

Compact and Simple

The PF-P310 is easy to operate - simply choose from four standard sheet sizes and select one of six common fold formats. Or, setup manually for special paper sizes and fold patterns. It's fast, economical and easy to maintain. You can easily change the feed roller and separator pad. Tool-less removal of the fold rollers makes cleaning or replacement a simple task.

PF-P310 Automatic Folder Specifications
